About Ayika Sciences

We Manufacture For You

In the last couple of years, Ayika Sciences has managed to evolve as one of the leading and most trusted manufacturers of medical wet wipes, cosmetic wipes, and liquid formulations. Our state-of-the-art manufacturing facility and highly skilled workforce have enabled us to serve our consumers with top notch quality products available in the market. We specialize in producing all kinds of Hygiene Products such as Disinfecting wipes, Alcohol Swabs, Antibacterial Body Wipes, Bathroom Cleaners etc to even your daily Cosmetic needs such as Baby Wipes, Makeup removing wipes, Hair Shampoos and many more.

Our Products stand like a shield between dirt, impurities and your hygiene solution and our continuous investment towards advanced technologies and a hygienic environment gives us an edge over our competitors in the market.

Our Production Facility

State-of-the-art facility and skilled workforce.

Manufacturing medical/cosmetic wet wipes and liquid formulations requires a mammoth production unit well-equipped with high-end machines and skilled hands. Our manufacturing plant and warehouse, located in Manesar, Haryana, is spread across a massive area of 50,000 sq ft. We have strategically installed Air Handling Units (AHU) containing HEPA filters to fight airborne dust particles and bacteria, maintaining the cleanest environment for production. To ensure high-quality output and hassle-free production, we have disintegrated the strenuous process of producing wet wipes and liquid formulations into five simple steps:

1. Consultation

At Ayika you get a 360* support and consultation on all your queries regarding your product under one roof- rite from conceptualizing to packaging. If you have the vision, we have the technology and workforce to accomplish it for you.

2. Formulation

As soon as we receive your requirements, our qualified and highly experienced team of scientists set about the R&D to come up with the best ingredients and blends for your product.

3. Production

Our colossal manufacturing plant equipped with advanced machinery enables us to take up production demand of any capacity under any given deadline. Such a massive and fully-automatic production unit ensure cost-effective products at a lightning pace.

4. Quality Check

We invest a considerable amount of time and resources in checking the quality of our products. Every product manufactured at the Ayika Sciences facility has to go through several levels of quality check. Our sharp-eyed Quality Control team carefully examines every product to ensure top-notch quality.

5. Packaging

We let our clients choose from a wide range of packaging options, including canisters, flowpacks, single tissue, refill pouches, and many more. Safe distribution and shipment of products is one of our priorities.

Our Certificates & Licenses

a well recognized manufacturing unit.

The Ayika Sciences manufacturing plant has been built in compliance to the laws articulated by the Ministry of Corporate Affairs, Government of India. We had to go through various legal checkpoints established by the Indian government to be able to produce such an extensive collection of cosmetic/pharmaceutical products at such a massive scale.

We, at Ayika Sciences, believe in transparency. Here are some of the major licenses our company has earned till date:

GMP License

FDA issued license for Cosmetic Product Manufacturing

Cruelty-free Certification

FDA issued license for Pharmaceutical Product Manufacturing

HALAL Certified

Our Product Packaging Options

Our continuous investment in State of the Art equipment and machines allows us to be one step ahead of the ongoing trends in the market. To ensure maximum shelf life of the product and to minimize damages, we have a wide range of packaging options available for our clients. Depending on the quantity and shipment of your product you can choose any of the following packaging options.

Flowpack Packaging

Flowpack Packaging is one of the most preferred packaging options available in the market. The presence of PET, PE or BOPP material gives strength to the packaging and makes it leak proof. We use recyclable material to ensure little-to-no impact on the environment.

Single Sachet

Just like the Flowpack Packaging, our Single Sachets are also made up of PET, PE or BOPP material to ensure no leakage during shipment and long life of the product. Single Sachets ensure high portability with supreme quality. We use biodegradable materials to make the packaging environment friendly.

Canister Packaging

If you are looking for a robust packaging option that can accommodate hundreds of wipes in one package, our Canisters Packaging is what you should choose. Our canister moulds (also known as buckets) are manufactured internally and are tested for damage and leakage before use. Canister Packaging is an ideal option for both domestic and international shipment.

Bottles & Tubes

Bottles and Tubes are the best packaging option when it comes to storing and shipping chemical formulations and cosmetic products. Our tubes are made up of special plastic that's impenetrable and have high chemical resistance ensuring better storage with no chemical reaction within the tube. Their cost-effectiveness makes them an ideal packaging option for both domestic & international shipments.

Why Choose Us?

A one-stop solution for all kinds of medical wipes, cosmetic wipes, & liquid formulations.

Since its inception, Ayika Sciences has embarked upon its journey of producing top-notch quality medical wet wipes, cosmetic wipes, and liquid formulations with a vision of a clean and green environment. We use biodegradable materials that leave no trace on the planet after usage. We have mastered the art of manufacturing high-quality medical and cosmetic wipes and liquid formulations in the most cost-effective way that our peers can never offer. We offer a variety of services right from research to the final production and packaging of the product. Our undivided dedication and unmatched capabilities have helped us to gain the trust of our consumers and clients.

Let's join hands to give consumers a hygienic lifestyle without damaging the environment.

B2B Collaboration

Collaborate with us for a cleaner and greener world.

We, at Ayika Sciences, are always willing to work with businesses that share our values and work ethics. Our ultra-modern manufacturing facility and competent workforce enable us to fulfill any kind of requirements when it comes to producing medical wet wipes, cosmetic wipes, and liquid formulations at large scales. Besides, the state-of-the-art machinery makes production cost insignificant when compared to the top-notch quality of the product. Over the years, we have had the privilege of working with some infamous international and domestic brands who prioritized service over revenue. If your business holds the same values, we are here to help.
